SAFETY MOMENT - Carbon Monoxide (CO)

Carbon monoxide (CO) causes upward of 400 deaths and results in the hospitalization of more than 4,000 people each year in the United States, according to the Centers for Disease Control and Prevention (CDC). Many of those falling ill don't know they have CO poisoning because it is a colorless, odorless, and tasteless gas. With proper inspection and housekeeping, Scouts and community members alike can prevent CO poisoning.

CO is a byproduct of many of your day-to-day activities. It is found in the fumes from gas stoves and lanterns, fireplaces, and the burning of charcoal, as well as from motor vehicles such as cars and boats. Additionally, CO poisoning most often occurs when the fumes are released within the confines of a small or closed-off room

Possible symptoms of poisoning: headache, weakness, dizziness, nausea, confusion, disorientation and/or sleepiness. Severe case - fluid in the lungs (pulmonary edema) and/or neurological disorders

Have a safety related question? – contact safety@ggacbsa.org

Sources of Carbon Monoxide	Car left running
Portable generators	Loose or broken ventilation pipes
Operating a grill indoors or in garage	Gas or wood-burning fireplace
Improperly installed kitchen range or vent	Portable kerosene or gas heaters/lanterns

Pesky problems? . . . don't know who to turn to? . . . Ask one of our Champions for help.
